ABOUT ME

Highly motivated and results-driven professional with exceptional expertise in Geology and Remote Sensing. Several years of hands-on experience in geospatial data management, analysis, and map generation using advanced Geospatial software, including ArcGIS, QGIS, and ERDAS Imagine and programming language like Python, R and GEE. Proven ability to deliver high-quality results in multidisciplinary team environments, with a strong focus on collaboration and attention to detail. Passionate about leveraging cutting-edge technology to address real-world challenges and drive innovative solutions in geospatial science. Committed to continuous learning and professional growth, with a dedication to contributing my skills and knowledge to impactful projects in the field.

WORK EXPERIENCE

Space Science and Geospatial Institute

City: Addis Ababa | **Country:** Ethiopia

[07/08/2024 – Current] **Associate Researcher, Department of Remote Sensing**

- Conducting state-of-the-art remote sensing research, especially in fields like geoscience, disaster management, environmental monitoring, and Earth observation.
- Developing new approaches or refining current methods for image processing, data analysis, and interpretation.
- Providing a technical assistance and remote sensing knowledge for interdisciplinary research initiatives carried out by the institute or external partners.
- Collaborating on national and international projects related to space science and geospatial technology.
- Conducting field surveys and collecting ground-based data to validate satellite data and improve the accuracy of remote sensing models.
- Collaborating with other scientists and geospatial experts in the field to gather reliable data for research projects.
- Conducting workshops and training sessions to improve the skills of students, government officials, and professionals in the use of remote sensing tools and techniques.
- Publishing research findings in academic journals and presenting at conferences.

[13/07/2022 – 06/08/2024] **Remote Sensing Lecturer**

I am sharing university academic workload, specifically the lecturers to students. Preparing and teaching classes, meeting with students privately regarding evaluation and compiling the lecture, and other academic duties with conducting research in my field of

study. I am participating in different community services besides teaching undergraduate students geology department. And I am participating in different training and national and international conference to update and share scientific papers.
